MAKER****MUSIC MAKER**

Now you can create and play your own music using Music Maker which includes the program, two sample songs and a blank data tape. There is a real synthesizer inside your 64!

Compose your own tune or take sheet music and input the notes. You will be able to play three voices and all ranges of notes. You can select the timing of each note. The Music Maker then converts the notes into data statements. You can compose and add music to your own programs or games.

The Music Maker will play through your speaker or through your stereo by hooking your 64 into any auxiliary input on your stereo system.

LOADING INSTRUCTIONS

1. Place the cassette into your datasette and rewind to start of cassette tape.
2. Hold down the shift key and press the RUN/STOP key. Your screen will now read "PRESS PLAY ON TAPE".
3. Press the PLAY button on the datasette and wait until the program loads.
4. When prompted "READY", type RUN on the computer keyboard and press RETURN.

This cassette contains two copies of this program, one on each side. If you have any loading problems, or if one copy gets damaged, use the reverse side. Before loading any program please ensure that the heads of your cassette deck are clean and demagnetised. The program recorded on this cassette is copyright. No reproduction of this program is permitted without the written approval of:
